

BEESWAX WRAPS

Beeswax wraps are amazing. They:

*Save you money – they can replace cling wrap for a lot of things

*Hygienic – beeswax is naturally anti-bacterial so no gross stuff will grow on your wrap

*Re-usable – can be used for approximately a year – just wipe them clean with a cool damp cloth and let dry

*Compostable – after your wax wrap is really tired from all its use, it can be put in the compost and breaks down in a few weeks

*Environmentally friendly – plastic takes approximately 1000 years to break down, beeswax wraps take a couple of weeks! And you get to use them for a whole year!
