

Snakes, streetlights and swimming pools

Do they impact on your physical activity?

We are looking for rural Tasmanians adults to tell us about how the local environment helps or hinders physical activity.

This study involves completing a brief online survey (around 20 minutes) twice, two weeks apart. All participants will enter a draw to win one of two \$100 VISA vouchers – it's our way of saying thanks.

If you are aged 18+ years, go to our survey website now.
